

COUNTING SCALES

RENTAL SCALES THAT ARE EASY TO USE AND ACCURATE.

BALANCES EN LOCATION FACILE À UTILISER ET PRÉCISE.

When you need counting scales fast, Interweigh Systems is the place to go with 4 locations to serve you in Toronto, Mississauga, Woodstock and Montreal. Our brand name scales are always clean, well maintained and ready at rental rates that make sense.

DAILY, WEEKLY OR LONG TERM RENTALS

LOCATION DISPONIBLE: COURT ET LONG TERME

Terms range from 1 day to 1 year or longer. Let us know about your own unique requirements and find out how Interweigh can help you!

DESCRIPTION

We specialize in renting out Dual Counting Scales for weighing and counting small parts or objects in a large container. Using two platforms connected to a single load cell, the unit weight of an item is measured on the smaller platform while the larger platform is used to weigh a large collection of these items in a container. Whether it is huge plastic containers of pills or tablets, skids of automotive or plastic parts, or large bins of coins taken from vending machines, our dual counting scales are ideal as a piece counting system. With a remote weighing base or platform that can be any size, locking wheels, casters or adjustable feet where needed, and forklift guides, these scales can be custom designed to suit a wide variety of applications.

DUAL PLATFORM OPERATION

FONCTIONNEMENT DE LA PLATEFORME DOUBLE

How It Works

Dual counting scales use two scales: one small scale and one larger scale. The smaller scale is used to sample the items to be counted as a method of obtaining the unit weight while the larger scale is used to weigh the item in bulk. The lightest item to be weighed and the heaviest filled container to be weighed are the two criteria used to establish which sampling scale and remote base are to be used. The lighter the lightest item is that is to be weighed, the more sensitive the sampling scale needs to be. The heavier and bulkier the tote or skid is, that contains the product, the larger and the greater weighing capacity is required, for the remote scale.

MAIN FEATURES

- ✚ Customized Platform Size - remote base options: 22" x 28" to 30" x 30" and 48" x 48"
- ✚ Locking Wheels
- ✚ Adjustable Feet where applicable
- ✚ Forklift Access Guides - which allow for moving by a front end loader.

DIMENSIONS

- ✚ Width = 22", 30" to 48"
- ✚ Height = 28", 30" to 48"

FLOOR SCALES

RENTAL SCALES THAT ARE EASY TO USE AND ACCURATE.

BALANCES EN LOCATION FACILE À UTILISER ET PRÉCISE.

When you need floor scales fast, Interweigh Systems is the place to go with 4 locations to serve you in Toronto, Mississauga, Woodstock and Montreal. Our brand name scales are always clean, well maintained and ready at rental rates that make sense.

DAILY, WEEKLY OR LONG TERM RENTALS

LOCATION DISPONIBLE: COURT ET LONG TERME

Terms range from 1 day to 1 year or longer. Let us know about your own unique requirements and find out how Interweigh can help you!

DESCRIPTION

We specialize in renting low profile floor scales for general purpose operations in shipping and receiving. Our low profile floor scales are ideal for weighing heavy objects such as drums and objects that require the use of a forklift, a dolly or a cart for transportation.

SINGLE AND MULTIPLE PLATFORM OPERATION OPÉRATIONS AVEC UN OU PLUSIEURS PLATEAU

Rugged

Durable platform design withstands forklift traffic. 300% overload capacity. 150% end-load capacity. Sum capacity of load cells is twice the scale capacity.

All Purpose

Easy to install. Levels with foot adjustment. Easy to relocate. Install above or below ground. Built in mild or stainless steel. Full line of accessories available.

Built to the Highest Quality

Uses shear beam load cells. Weights & Measures approvable. Understructure bracing is built with structural steel. Nema IV rated control box enclosure.

MAIN FEATURES

- ✚ Mild or Stainless Steel
- ✚ Custom Sizes
- ✚ Precalibrated Indicator
- ✚ Smooth or Checkerplate

DIMENSIONS

- ✚ Width = 2' to 6'
- ✚ Height = 3.5" to 5.0"

CUBISCANS

CUBISCANS THAT ARE EASY TO USE AND ACCURATE.

Manage your space more efficiently and reduce your shipping costs using the latest in dimensioning and cubing technology. Interweigh Systems offers both static and dynamic dimensioning systems to handle all your inbound and outgoing operations. Our dimensioning systems will help you operate more efficiently and will play a critical role in your efforts to maximize your logistics planning, storage space allocation, material sorting, manifesting, and general material handling and warehousing processes.

DESCRIPTION

The CubiScan 100L, an integrated cubing and weighing system, gives you total control in any distribution center or warehouse application. Imagine the benefits of collecting your package information (weight and size) quickly and consistently—there's no need for second guessing, no room for human error, no reason to re-enter data, and no data corruption.

Finger Tip Control

An integrated digital display and control panel allow finger-tip control. Innovative software gives you numerical dimensions and weight and an instantaneous, three-dimensional graphical representation of the parcel being measured. So check into the Cubiscan 100. You'll discover what hundreds of users already know. Time is money. And so is real estate. Make the best use of both.

Distribution

The CubiScan 100, an integrated cubing and weighing system, gives you total control in any distribution center or warehouse application. Imagine the benefits of collecting your package information (weight and size) quickly and consistently—there's no need for second guessing, no room for human error, no reason to re-enter data, and no data corruption. And, the information is easily transferred to your data processing system where it can be used immediately.

Manifesting

Tested and certified as a type-approved, legal-for-trade cubing and weighing device, the Cubiscan 100 (LFT version) is a valuable tool in freight manifesting. Quicker and more reliable than manual measurements, the CubiScan 100 helps shippers get it right the first time by applying the correct dimensional-based shipping charges and eliminating those costly Charge-Backs. For carriers, you can easily and reliably audit the freight you receive from customers.

MAIN FEATURES

- ✚ Operating Speed: 1 – 2 seconds per measurement.
- ✚ Works with warehouse management system software.
- ✚ Facilitates storage location selection, order picking, carton selection, and shipment planning.
- ✚ Compatible with case packing/load optimization software packages.
- ✚ QBIT™ PC interface software included.
- ✚ Dimensional and weight data available in metric and/or imperial units.

DIMENSIONS

- ✚ Width = 32" (813 mm)
- ✚ Height = 48" (1,220 mm)
- ✚ Length = 32" (813 mm)
- ✚ Weight = 70 lbs (32 kg)
